

Wang Yu - AI Product Engineering Intern Candidate

Email: wangyu@example.com | Location: Shanghai

Target: Agent Intern, LLM Application Intern

Core Skills: Python, FastAPI, SQL, LangChain reading notes, RAG coursework, UI prototyping, data analysis

Project: Campus Offer Helper

Created a prototype for collecting job posts and comparing resumes. The first version used keyword rules and simple SQLite tables.

Coursework: read papers about ReAct, Plan-Execute, vector search and reranking. Planned to add Chroma but did not ship the vector module.

Project: Resume QA Demo

Implemented a small PDF text extraction demo and Streamlit page. It could answer basic resume questions but had no production tracing.

Notes: no deployed browser automation, no MCP integration, no real online application submission.

Education: Software Engineering, 2026
