

Li Ming - Agent Development Intern Candidate

Email: liming@example.com | Phone: 13800000000 | Location: Shenzhen

Target Roles: Agent Development Intern, AI Application Development Intern

Skills: Python, FastAPI, SQLite, RAG, Chroma, LLM, prompt engineering, evaluation, guardrails, Playwright, pytest

Project: CareerAgent

Built a career assistant agent for Chinese internship scenarios.

Implemented PDF resume chunking, SQLite metadata storage, vector retrieval, Top20 reranker, JD parsing, job matching, resume tailoring, application packet generation and interview preparation.

Designed Plan-Execute workflow with traceable steps, artifacts, LLM call logs and guardrail repair loop for high risk resume drafts.

Used FastAPI async endpoints, SQLite persistence, background task progress, RAG evaluation datasets and full-flow LLM workflow tests.

Measured PDF chunk and RAG strategies with synthetic noisy samples, selected section-aware chunking plus overlap and reranked retrieval.

Experience: AI Application Lab Intern

Developed internal tools with Python APIs and dashboards. Wrote pytest cases and monitored latency, error traces and structured JSON failures.

Education: B.S. Computer Science, 2027
