

Chen Hao - Backend Platform Intern Candidate

Email: chenhao@example.com | Location: Beijing

Target Roles: Backend Intern, AI Platform Intern

Skills: Python, Java, FastAPI, MySQL, SQLite, Redis, Docker, pytest, REST API, basic LLM API integration

Project: Operations Dashboard

Built FastAPI services for task queue status, request metrics, configuration masking and admin token checks.

Designed database models, pagination APIs, validation logic and deployment health endpoints.

Project: Document Processing Service

Implemented PDF text extraction, section tagging, chunk storage and asynchronous batch processing for internal documents.

Related AI Work: integrated an LLM JSON extraction endpoint and added retry logs for invalid JSON responses.

Gap Notes: limited hands-on reranker tuning and no large scale vector database deployment.
